General

- R1. Authentication: email/password (Google sign-in is optional)
- R2. A Data Room belongs to its owner and isn't visible to others unless shared
- R3. Clean UX, edge cases and error states handled, no unimplemented features shown

Folders

- R4. Create a folder and nest folders
- R5. View folder contents with breadcrumb navigation
- R6. Rename a folder
- R7. Delete a folder with all nested content, warning the user what will be deleted

Files

- R8. Upload PDFs: multiple at once, drag-and-drop, per-file progress
- R9. View a file in the UI
- R10. Rename a file, resolving name conflicts in the folder
- R11. Move a file to another folder
- R12. Delete a file

Sharing

- R13. Share a Data Room, folder, or file, read-only, including nested content
- R14. Public link mode (anyone with the link)
- R15. Permissioned mode (specific users only)
- R16. The owner can revoke access

Edge cases named in the task

- E1. Uploading files with the same name
- E2. Deleting a folder that someone it was shared with is viewing
